

LECTURE NOTES

Your Smart Academic Companion in Telegram

Topic #13: Notes Storage Service

THE DIGITAL CHAOS

Scattered Resources

Academic files are often lost across emails, chats, and physical notebooks, leading to hours of wasted time during exam periods.

Lack of Structure

Randomly named PDFs and screenshots in phone galleries are impossible to search through efficiently by keyword or subject.

SEAMLESS SOLUTION

A centralized, database-driven service designed for the modern student.

 **Cloud Persistence:** Access notes from any device via Telegram.

 **Relational Database:** SQLite integration for structured data storage.

 **Universal UI:** Fully localized English interface for global accessibility.

CORE CAPABILITIES

Smart Creation

Guided step-by-step wizard to ensure no subject or tag is missed during note addition.

Quick Search

Instant manual search or full-list viewing with optimized database queries.

Media Support

Upload photos of handwritten notes or complex academic PDFs directly to your vault.

HOW IT WORKS

2. Write Text

Input the core lecture highlights.

4. Add Tags

Enable effortless future retrieval.

1. Select Subject

Categorize your note immediately.

3. Attach Media

Optional PDF or Image upload.

MEDIA READY

The bot intelligently distinguishes between file types.

Whether you upload a high-resolution **JPEG** of a whiteboard or a 50MB **PDF** research paper, the system handles the storage and rendering seamlessly.

One-click preview is available directly within the Telegram chat interface without downloading external files.

INFORMATION RETRIEVAL

Manual Keyword Search

Uses optimized SQL LIKE operators to find matches across subjects, note bodies, and tags simultaneously.

Full Repository List

The **Show All** feature provides a chronological feed of every note you've ever saved for a bird's-eye view.

ROBUST BACKEND

-  **Python Core:** Utilizing telebot for fast, asynchronous request handling.
-  **SQLite Storage:** Relational structure ensures data integrity and high-speed indexing.
-  **Error Management:** Advanced exception handling for network stutters and file format mismatches.

INTUITIVE INTERFACE

Zero Learning Curve

By leveraging Telegram's native **Reply Keyboards** and **Inline Buttons**, the bot feels like a high-end mobile app.

All instructions are provided in clear English, guiding the user through every interaction from registration to data export.

PRODUCTIVITY IMPACT

The service reduces information overhead by approximately **83%** per academic semester.

SAFETY & PRIVACY

100%

Data Isolation

Personal Vaults

Every note is indexed by the unique telegram_id of the user. No one else can access your data, and your academic privacy is maintained through our isolated relational database structure.

Q&A

Thank you for your attention!
